

Thomas FOURNIER

Mechanical engineering student seeking a 5-months engineering assistant internship

Education

- **2024-2027 - ISAE-Supmeca : Institut Supérieur de Mécanique de Paris**
Master's degree to be obtained in June 2027
Main courses : CAD, Fluid Dynamics, Thermodynamics
- **2022-2024 - Two year selective and intensive scientific curriculum preparing for the national competitive examination to French Engineering Graduate Schools**
Majors in mathematics, physics
- **2022 - Scientific high-school degree**

Work experience

- **2024 - Formula Student Project**
 - Member of the Supmeca Racing Team - design of a racing car for international competitions (UK, Germany, etc.).
 - Work on the car's chassis, steering, suspension, electronics, propulsion and aerodynamics.
- **2023/2024 - Supervised personal initiative work - T.I.P.E**
"Study of the aerodynamics of the rear wing of F1 cars"
 - Developed the design and the sizing of a rear wing model using Sketchup
 - Studied the airflow using a 3D printed model
 - Achived a numerical simulation of the airflow over the wing (FluidX3D software)
- **2024 - Organisation of a sports tournament - Lycée Claude Fauriel**
 - Established the link between students, the school administration and the town hall.communication through social networks, management of registrations and the tournament format
- **2019 - 9th grade internship - Skylights**
 - Carried out a series of tests on immersive augmented reality headsets

Main interests

- **Volunteering**
 - Active member of "New Défi" - Supméca humanitarian association facilitating access to education by building new infrastructures and providing school supplies.
- **Music**
 - Piano - 10 years in music school
 - Computed-assisted music - FL Studio 20
- **Sports**
 - Ski, football, tennis
